

THE BLUETOWN BASE STATION OFFERS MORE THAN WI-FI

- 1 Microwave link antenna to connect to existing telco infrastructure or alternatively to existing BLUETOWN village
- 2 High gain Wi-Fi sector antenna to communicate with end user device/handset

- 1 Solar panel to provide power to the batteries
- 2 VSAT satellite antenna to allow for connection using geostationary satellite as backhaul connection
- 3 BLUETOWN power unit to store power harvested from the solar panels
- 4 Easy Internet connection by existing infrastructure via fiber
- 5 Fence around the installation to provide equipment security from theft
