How to Use the Fixed Solar Panel and the Accessory Solar Panel (if supplied)

**Fixed Panel.** Place the radio in the sun so that the sunlight falls onto the solar panel on the top/back of the radio.

**Accessory Panel.** The solar panel will only work if it is plugged into the hole on the side of the Player. The solar panel needs to be placed in direct sunlight to give the Player power.

**How to Use Your FreePlay Encore Wind-Up and Solar Powered Radio and MP3 Player**

If Player runs out of power while you are listening to it, first switch it off before you recharge it with the wind-up handle or the solar panel.

1. Lift up the antenna for better reception.
2. Turn the tuning knob to choose a radio station.
3. Turn this knob to put the radio on, make the radio louder and to turn it off.

How to Wind the Handle:

- Turn the handle to the right or to the left for about 60 times or more.
- The handle must be turned hard enough so that the green light on the back of the radio goes on. The radio will play for about 30 minutes.
- The more you turn the handle, the longer the radio will play.

Make sure the cord is always plugged into the correct hole at the side of the radio.
